

## CHAT LOG for PluginFocus: Foobar

BenjaminBradley Today's webinar on the Foobar plugin will begin at 1pm Central time.

BenjaminBradley The chat room will open a little before 1pm (Central)

BenjaminBradley We will begin in about 40 minutes.

ChrisMalone Anyone here use mulitsite and know how to apply settings for which sites have access to which plugins? I know how to do themes, but having trouble figuring out plugin permissions.

BenjaminBradley "Chris - you need to allow ""Administrators"" to enable/activate plugins."

BenjaminBradley Once you allow that, you as the Administer or any user who has admin capabilities can activate specific plugins

BenjaminBradley Future versions of WordPress is looking at a similar way that themes are enabled

BenjaminBradley but right now its just up to an Admin

ChrisMalone Got it. Thanks!

Valerie When's the podcasting class going online?

BenjaminBradley I'm going to have to wait until Justin gets back in town.

BenjaminBradley Our goal is to always get the webinar uploaded within 24 hours

BenjaminBradley but he went out of town.

pixeljuice Benjamin, when I try to renew my WD membership, the form is telling me that my username is already taken. I suppose I'm using the wrong form to do this. Yes?

BenjaminBradley @pixeljuice - yeah, that sounds a little strange. Can you contact [sales@webdesign.com](mailto:sales@webdesign.com)

BenjaminBradley Char and her team should be able to help out

pixeljuice Yes. Will do. Thanks.

BenjaminBradley "This webinar is a great ""addon"" you can ""sell"" to clients."

BenjaminBradley Will be fun to dig into this plugin.

BenjaminBradley Also, put it on your calendar, I'll be doing a special presentation of the new WebDesign.com website and how to use the site along with some previews of upcoming features tonight at 6pm Central BUT it will be in a new location.

BenjaminBradley We're going to try out Join.me

BenjaminBradley You will need to logon to <http://join.me/professor>

ChrisMalone Foobar is cool. I got one set up on a ministry site I do (personal). I've got to debug javascript though. For some reason it works in preview but not live.

BenjaminBradley i wonder if its a conflict with another plugin

Sanford Greetings All...I renewed my tool kit with the Coupon - and feel great about it!!

Becky No  
MJ\_McL @Tanja. I hear you. But ALL countries have their ups and downs and at least the WI did have a world domination period  
  
MichelleO @BB we can only see your survey not the abar  
David A Rosales @Tanja can do it in Windows 7  
David A Rosales WHAT IF I DO ALL THAT  
ChrisMalone But now on FOOBAR

Barbara Rowen @Kerry, that's what I thought.  
Andi oh no, the jokes begin...  
Deborah lol  
Doug love it!  
MichelleO We love it!

Sanford @kerry - yes saw it on your US website - looks cool!  
Barbara Rowen @Kerry, you're good...

Jerry Kaup How would you allow them to share on THEIR account?  
Roz Fruchtman Hi All!

San what if they dont have the icon, can we add one  
Roz Fruchtman @Benjamin - Is Google+ there?  
David Perednia Is FooBar only available at the top or can it be positioned to one  
side of the screen or another?  
David A Rosales sidebar foobar?  
Andi widget foobar?  
David Perednia I meant on the side of the screen like the ithemes tabs to the right  
Roz Fruchtman @Benjamin - Thanks.  
Barbara Rowen @Roz, good to see you today. Have you been well?  
ChrisMalone Beware....if you don't name it and do all your customization and hit  
create without naming it? It all goes away and you start over.  
ChrisMalone How do I know this?  
ChrisMalone That's none of your business!  
wayward @ChrisMalone I take it you speak from experience :)  
ChrisMalone But it happened 3 times.  
Barbara Rowen @ChrisM...sounds like the voice of experience...  
ChrisMalone Slow learner  
Migdalia @Chris - LOL  
Kerry hey Roz, did you get the email for purchase discounted WebDesign  
Membership... they said it was the biggest discount for the rest of

Valerie @Kerry, are you talking about the 45% coupon code?  
MichelleO @kerry - email for discount - - - for renewals too?  
Jerry Kaup It pushes down all content?  
pixeljuice I just renewed too.  
Kerry @Michelle yes just sign in and you should be able to see a discount  
code  
Sanford so the Preview automatically shows - or do you have to do  
something - to get it to show?  
MichelleO @K tku  
Andi can you show the collapsed state, BB  
Sanford got it!  
MJ\_McL @Sandford - An option in the top righthand side box  
Andi thanks.  
Kerry Here is the link to the blog post: [http://ithemes.com/2011/09/27/  
save-30-45-on-top-web-design-training/](http://ithemes.com/2011/09/27/save-30-45-on-top-web-design-training/)  
Andi I have clients who don't want to super-emphasize SN, so this is  
good.  
Sanford thanks @MJ.  
Sherry BB- can you put a link to a pdf on the foobar?  
Kerry @Andi the message part coming up is even more impressive  
Kerry there is already a lot of built in css right in the plugin too  
MichelleO COOOOL  
ChrisMalone That's awesome that you can use any rss!

wayward @BB you have RSS disabled  
wayward I'm an enabler  
Sherry @Wawayrd lol  
Chel i love you can enter multiple msgs  
Jerry Kayne Update?  
Valerie Unless you're using feedburner...  
Andi oooooooh.  
wayward nice  
ChrisMalone Can you do more than one rss feed?  
Kerry @Chel and when you add a page or post on the actual page or post it asks which one or ones to show when a visitor is there  
ChrisMalone On the same foobar?  
Barbara Rowen @BB, I tried to explain what an RSS feed was to a client and confused them. Is there a simple explanation to give?  
ChrisMalone nope  
BenjaminBradley <http://pipes.yahoo.com/pipes/>  
Kerry nope  
Valerie Not in years! I forgot it existed.  
MichelleO sounds like DOS - -  
ChrisMalone free?  
Kerry nice  
ChrisMalone even better.  
Chel That'S cool @kerry  
ChrisMalone the UI is certainly cool.  
Andi the interface is fun  
Kerry y@BB your twitter sign in is still showing too  
Tim@TechVudu what did i miss besides 23 minutes?  
Kerry @Tim man you blew it... it is just about done....jk, not much  
Roz Fruchtman Can you do the tweets again. You did that too fast.  
Barbara Rowen @Tim, glad you made it. Just going over the settings of Foobar  
Nathan Howdy folks... had to catch it by phone till now  
Barbara Rowen @Nathan, we were wondering about you.  
Kerry @Nathan be sure to download and READ the download, lol  
Barbara Rowen Glad you made it  
Jerry Kaup Don't I want visitors to share on THEIR Social sites?  
Nathan @Kerry - good tip :P  
Andi is BB still there?  
pixeljuice any semi transparent options for the bar?  
Kerry @Nathan we are stars... hehehe  
wayward pixeljuice u could prolly do that with custom css  
pixeljuice that works too wayward. thanks  
wayward omg, that's great  
wayward that is a well thought-out plugin  
Nathan "Ahhh... I see that! (heard the name drop earlier too) I was picking up the kids and my oldest said ""did he just talk about you?""

Kerry I promote iThemes on theme articles and PluginBuddy on Plugin articles in my blog

ChrisMalone Yeah pretty amazing it's only 9 bucks.

ChrisMalone Hi @nathan.

Nathan Howdy Chris... you back stateside?

ChrisMalone Yeah, got back Saturday at noon.

David Perednia The amazing thing about plugins is that you can get really well thoughtout and designed plugins like foobar for only \$9.00 and other crappy ones cost much more.

Kerry \$9/use... remember codecanyon plugins have the weird licensing... one per site - but still cheap so good either way.

ChrisMalone Yeah but you can upsell it for \$50 each

CarolCody Benjamin, what theme are you using on WP Chef?

Kerry @chris oh yes for sure

Kerry Hi Carol! Good to see you

Nathan @Carol - that's Encased

Roz Fruchtman "I use this personally... So it is \$9 for ""EACH"" WordPress Instalation?"

Kerry @Carol Encased

Kerry Nathan beat me

ChrisMalone Woohoo...that is now ME!

ChrisMalone Have clients I mean.

ChrisMalone :)

CarolCody @Kerry & @Nathan - thanks

Kerry @Roz yes

Nathan Yes... please send a \$10 royalty each time you use that name

David Perednia The Ultimator

Kerry @Nathan, I like it

CarolCody "Hi Kerry! Nice to ""see"" you too :)"

CherylP How does this compare to the wibiya toolbar?

Chel you can rename it right? so they wouldn't know it's foobar you added?

Kerry @Chel yes

pixeljuice If the client is setup as an editor, do they have access to this?

MichelleOagain Hi @Nathan

Nathan Hi Michelle :)

MichelleOagain downstairs now making lunch - -

Kerry @MO, LOL I was wondering about the name change

Andi wondering if you can place a foobar in a widget

Valerie anyone have a code canyon affiliate link?

David Perednia Do you have a link for CodeCanyon Foobar so that we use your affiliate link?

Nathan it's outside your layout

Andi OK, outside the page/site. got it

tanja the link in the pdf is BB's I believe

Kerry <http://codecanyon.net/item/foobar-wordpress-notification-bars/411466/KerryCarron>

Nathan it's hung on one of them there hooks  
CarolCody Hi Valerie!  
David Perednia <http://codecanyon.net/item/foobar-wordpress-notification-bars/411466?ref=BenjaminBradley>

Tim@TechVudu "so if it's ""outside"" your site, does it play nice with backup buddy or do you need to know any BUB configs to get it to backup the settings?"

Valerie <http://codecanyon.net?ref=cdghosting>  
Kerry @Tim it is still a plugin sostill should be in the BU  
Nathan @Tim - not outside your site, outside your layout. BUB will do fine with it

Tim@TechVudu @Nathan...ok.  
MichelleOagain @Kerry - in the family room :)  
Jerry Kaup Could you put a Gravity Form subscribe form in the FooBar?  
MichelleOagain Still on upstairs  
Nathan @Jerry - nice idea!  
Nathan A GF shortcode maybe?  
ChrisMalone Get out! That's cool.  
Nathan @BB - would a shortcode work?  
Valerie Kerry, just used yours.  
Nathan avoid the eye  
ChrisMalone pigs?  
wayward I miss the eye  
Nathan I think we just broke BB  
Valerie Gotta love live training!  
Roz Fruchtman Have you seen Print Friendly <http://www.PrintFriendly.com>? You can print almost any webpage/blog and create PDF as well. VERY NICE. It is a WordPress Plugin

Roz Fruchtman Oh FriendFriendly is FREE.  
Andi can you put a foobar at the bottom of your page?  
Roz Fruchtman MEANT: PrintFriendly is FREE  
Kerry oops... here is an affiliate link that will actually work for whoever asked: <http://codecanyon.net/item/foobar-wordpress-notification-bars/411466?ref=KerryCarron>

wayward thnx @Roz  
Doug Maybe a sticky bottom?  
Nathan eww  
Andi just looking for a way to de-emphasize it a bit, without having it collapsed

ChrisMalone @doug... just sit in honey  
Doug LOL!  
Valerie @kerry it took me to a bad page, but it should have recognized your affiliate link, hopefully.

Kerry @Valerie the the one just above should work, no?

MichelleOagain @BB Ctrl-F and search for it  
Barbara Rowen @Roz, PrintFriendly works pretty slick...most times. It doesn't display properly on archive pages sometimes though.  
Nathan Find > Header  
David Perednia You just passed a bunch of add\_actions about 1/3 of the way down  
Andi hope others are interested in this... I appreciate the effort here  
Kerry @Valerie, not like I will make much on a \$9.00 purchase but hey, I will take anything...  
wayward @Andi I am too so thanks for asking  
Aditi what does 'echo' out a style mean?  
Andi thanks, would love to know that.  
Nathan @Aditi - that's where the php file inserts the css for foobar into the web page  
Aditi thx nathan  
Chel Ugh.. My net is  
Nathan "@Aditi - in php ""echo"" means put something somewhere"  
wayward Good for member areas too  
Kerry @Nathan do you have a few minutes sometime soon? I would like to run a challenge by you  
ChrisMalone How to use Share buttons?  
ChrisMalone Facebook...  
Sherry BB: how do you style your custom html?  
Nathan @BB - does foobar goof up absolute positioning like the WP admin bar?  
ChrisMalone Okay.  
David Perednia Did we conclude that there is no way to move from top to right or left?  
Nathan wow nice  
Roz Fruchtman See you all next time.  
Roz Fruchtman @Benjamin THANK YOU !!!  
Barbara Rowen Bye, @Roz  
Sherry @BB -- can show us how to style your custom 'hello'  
Nathan I want to put an upside down Panda in a foobar  
James Did this replace the admin bar or is the admin bar deactivated?  
Doug Me neither  
Barbara Rowen @Nathan, I'd like to know how also...  
James What if the client turns it on with the Foo bar?  
James From last week?  
Kerry Here is some gee whiz info: Typekit has been acquired by Adobe.  
wayward @Kerry, really? hmm.  
Sherry @Kerry -- what's typekit?  
Ruanna What's the downside of a client seeing the admin bar?  
MichelleO Back upstairs :)  
Nathan @Kerry - I'll bet the Master has some take on that  
wayward I think it confuses them too  
Ruanna haha - okay thanks!

MichelleO I can't stand the admin bar  
Doug "It messes with all those ""Above the fold"" types"  
James You use that code from last week to disable it? What's a good explanation for them not to use the admin bar?  
Nathan Client to me: there's a bar that gives everyone access to my web site at the top fo the page  
Migdalia @BB - will it set on top of a regular image?  
Kerry @Nathan I bet he would be surprised if he did not already know  
Barbara Rowen @BB, did Webdesign.com use Foobar to add the upside down Pando on the right hand side?  
Jerry Kaup Let me hear that client imitation again!!  
Nathan Never underestimate the ability of the client not to stay told.  
wayward I don;t even like the 'edit post' link, never mind the whole admin bar  
Kerry @Barb no, that is part of their new live chat stuff  
Barbara Rowen @Kerry, thx  
wayward which is basically everything  
James What's the php page to put in that filter code to disable the bar?  
Nathan it's poobar  
Barbara Rowen @Nathan...lol...man, you crack me up.  
BenjaminBradley add\_filter( 'show\_admin\_bar', '\_\_return\_false' );  
Ruanna thank you for that!  
wayward ty @BB  
Barbara Rowen @BB, does that turn it off for all admins of the site?  
James Nice bonus!  
Barbara Rowen great  
Kerry I still don't get why it is there at all  
BenjaminBradley <https://join.me/professor>  
Nathan cool name  
CarolCody @Kerry - someone must have thought it was a good idea...  
MichelleO OMG  
Nathan Oh cool... it's LogMeIn  
Sherry @BB - I can't make it -- will you be posting it for later viewing?  
wayward yes yes yes!  
ChrisMalone Has audio too?  
MJ\_McL Yes, please.  
BenjaminBradley <https://join.me/professor>  
Nathan It's a LogMeIn product... I love their stuff  
ChrisMalone I love logmein

Chel bye everyone. good night

Ruanna Bye everyone, see ya next time!  
Kerry @Nathan, I missed if you answered if you have some time to chat

Kerry by Ruanna  
Cherylp what did u say about our logins not working on the new  
webdesign.com site?  
BenjaminBradley Nathan - I'm testing out the pro version  
Nathan @Kerry... missed that... I'm about to crank up Skype  
Kerry @Cherylp sign in with your iThemes credentials  
Barbara Rowen Guys, I noticed BB was using PrintBuddy on WPChef but I can't  
find any info on it. Is it new from PluginBuddy? Anyone know?  
Cherylp @kerry bummer...my ithemes credentials don't work either...tried to  
get a new pw sent to me but they never respond to my requests  
BenjaminBradley It's a new plugin I was developing  
Kerry @Cherylp use the sales caht panda... they will get you fixed up  
BenjaminBradley going to try and integrate it into LoopBuddy  
Barbara Rowen @BB, you're developing Print Buddy?

BenjaminBradley yeah, notice how you can click on the icon for the post and it automatically rewrites the URL to a printer friendly page

BenjaminBradley reformats the post(content) and removes images and cleans it up

BenjaminBradley @BB, yes I did which is why I'm interested in it. It works pretty slick.

Barbara Rowen "you could also type the word ""print"" on the end of any post url...

BenjaminBradley and it will convert it to printer friendly"

Barbara Rowen @BB - I know several of us have been clamoring for which a plugin.

Barbara Rowen SWEET!

CherylP @kerry - no operators available...

Barbara Rowen @BB - I'll be interested in testing it on my own site. I don't like the way PrintFriendly works on it.

James I stepped away. What's the topic of tonight's webinar?

BenjaminBradley Impromptu overview of WebDesign.com and how to do a live streaming event using Adobe Live Media Encoder

Kerry try writing to sales CherylP

wayward @Kerry or @anyone does this coupon work for wd toolkit, or just wd.com membership?

BenjaminBradley Coupon works for both membership and toolkit

James Where's the reg link?

Barbara Rowen @BB - I've been working with the City Church theme and the Church plugin on a site. How do I get the loop of the staff page (which is dynamically generated) to show the entries alphabetically instead

wayward @BB thanks :)

Barbara Rowen instead of the typical by time of entry?

Valerie @nathan, what's the ical feed address? I can't find it. (again)

BenjaminBradley @James - no registration, just show up at <http://join.me/professor> at 6pm central

BenjaminBradley I also put the permanent link in the sticky message area... just refresh the browser page

James K

Barbara Rowen @BB - Loop Buddy can't help me on this...because of the page being dynamically generated...\

BenjaminBradley @Barbara, just need to modify the query

Barbara Rowen @BB - makes me tremble with fear.

Barbara Rowen @BB, I'm getting into the code more and more, and at times actually understanding it. Unfortunately, the query I'm not understanding so much. Maybe there's someone here that can help me. Thx BB

BenjaminBradley @ Barbara, I'll take a look

Barbara Rowen @BB - I think I've identified where to look...in the archive-staff.php file. I see the loop calling...and then I get lost. I'll hv to read the Loop in the WP codex. Hopefully, that will shed some lite
