Kerry bet it skips the wp-content directory
Nathan interesting...
Kerry "what IS actually in the ""bundle""?"
Nathan I'll be adding that code to my wp zip I replicate for new installs
Andi "@karen, google ""david duchovny pedigree rescue ad"" and you'll have fun cryin' your eyeballs out."

pixeljuice excellent
Kerry would there ever be anything IN the wp-content that you DO want updated?

Debra Wouldn't you want Akismet updated?
Nathan @Kerry - good question
James Should we just place this in all new sites
Debra OK
David Perednia Is Twenty Ten also a bundled theme?
wayward wow, this si good to know
karen wayward. Just sent it.
Debra Can you put this line of code anywhere in the wp-config file?
suziekane @BB is this recommended to do standardly if we are only partly sure of what you are talking about?

suziekane :)
Andi jetpack again is...?
HRH Canadians don't have an accent - they have accents!
Nathan <http://wordpress.org/extend/plugins/jetpack/>
suziekane got it. Thanks, BB

Debra Bleah--Pugsley talk
wayward blecccchhhhhhh
John M :
Jerry Kayne do you spell that bleh or blehh
Kerry ewe I don't want jet pack either... I agree blehh
HRH missed the pugsley story - is it on the recording?
Nina! I have one client who has insisted on using 2011 theme, so I created a child theme to work with it. My child theme settings would still remain, yes?

John M :)
Debra Depending on your sinuses
OverHall Speaking of beagles get out your tissue and watch this amazing video: <http://www.godvine.com/Beagles-See-Sun-and-Grass-for-the-First-Time-After-a-Life-in-a-Laboratory-861.html>

James If I accidentally developed my first wp site in TwentyTen I should use this?

Kerry @Nina yes
Nathan @Nina - until 2012...
Nathan :)

Kerry @Nina and that approach is a great way to use those!
 wayward @Overhall you're gonna kill me with that video :)
 HRH Janet -I watched that a few days ago- brought tears to my eyes
 Nina! thanks guys
 OverHall me too - I would love to get one of the dogs!
 Kerry @James create a new child of your own using the style sheet from
 you existing... then activate
 Kerry "HA! I found this the other day... I was thinking... ""coool""
 Nathan NO WAY. I could have used this last week :/
 HRH I want to get rich so I can adopt and protect all the dogs in the world
 and their progeny
 Trish me too!
 wayward @HRH my husband wants to do the same for cats
 Nathan push the text off with positioning and set a background!
 Barbara Rowen Hi guys. Just got here. What have I missed?
 Deborah @HRH @OverHall u seen the American OSPCA commercials?
 OMG. Best marketing ever I think. I want to adopt all of them &
 bring home.
 MikeB I always wondered what this did but never messed with it...
 Jerry Kayne Wow, that css is in 3D
 OverHall My neighbor adopts cats and BIG dogs and old horses - it's a zoo
 next door!
 HRH I love you guys, love this community (and your husbands) who want
 to protect animals
 Kerry @Nathan that is what James and I did on [http://
 demo2.customwpsites.com](http://demo2.customwpsites.com)
 Nathan yeah cool
 wayward cuuuuuute
 kathy nice!
 HRH I love thy neighbour too, Janet!
 Kerry both of our dogs are rescued dogs... I cannot image being without
 them - but I also still love that hubby is a hunter, good eats (just not
 the dogs, ;))
 CoachB I love animals. There are several people I could do without
 though... ;))
 suziekane this is so cool!
 wayward @HRH husband drove 2 hours out of town to rescue 2 old cats who
 were going to be shot (!!)
 John M @bb in your menu page, what is the videos?
 Deborah @Kerry oh right, I remember you're the one w/the guns. ;))
 Kerry @CoachB was waiting for you... after I posted my comment, lol
 David Perednia Yesterday you gave us a URL for ?ingram.com which is very nice
 Builder site. He has 3000 Free Icons for download which can be
 added to menu and other items.
 wayward @Kerry wish I could go hunting... would love to.
 Kerry @Deborah yup!

Deborah @CoachB amen to that!
 Nathan @David - www.nathaningram.com
 Kerry @Tracy I have never been hunting but I love to Fish
 David Perednia Thanks Nathan, is that your site? I love it!
 Nathan @David - yes, thanks :)
 OverHall @Kerry - me TOO! Chesapeake Bay every chance I get
 CoachB That's why I don't have guns in my house. Not because of possible accidents. Because of potential intentional...
 Jerry Kayne "@Benjamin: any reason you didn't put the icons in the ""images"" folder (or other)?"
 wayward @Kerry my redneck cousins (their words, not mine) hunt - they've promised to take me whenever I can get out to them in the sticks
 Deborah @Coach :P
 Kerry @Janet I don't do much anymore since moving to NM... we live in a high desert basin now
 Kerry @wayward my hubby is a self proclaimed redneck, lol
 wayward lol
 HRH follow me, twit!
 wayward discovering that text indent opened a whole new world of nav menus for me :)
 Becky @Kerry I didn't know that there are rednecks in NM...we have lots of them in NC
 Kerry @HRH LMAO
 Nathan "If you look around back of your monitor, you'll see the text ""Twitter""
 CoachB "BTW, on hold on tech support while monitoring this.. anyone you want me to say ""Hello"" to in the Philippines or India"
 Andi clever
 CoachB ?
 CoachB Peggy?
 MikeB That is way cool!
 Kerry @Becky oh my yes... mostly all the white people, lol... have to be, there is nothing else out here!
 John M yup
 OverHall love it!
 Andi yep
 MJ_McL @CoachB Boris !
 Barbara Rowen it will on the replay... :D
 Jerry Kayne Thanks for giving us this info. Very cool tip for us to be cool to our clients
 Nathan This is handier than grabbing the individual menu item's class
 Chel hey CoachB -- i'm in the Philippines. LOL
 wayward @Nathan totally
 HRH Hello Chel!
 Nathan Nice to be portable between sites too

Kerry @Becky the other requirement to living in NM is speaking Spanglish that is what the local language is (for real)

Supersonics Forever OKay, that social icon in nav tip is one of the best things I've learned here at wd.com. So simple, yet so useful.

Debra "BB-Can you add an image that ""breaks out"" of the menu, i.e., is bigger than the dimensions of the nav bar?"

Trish @BB So can you put the css in Style Manager if you wanted to instead of directly in the file?

John M @bb on your menu page, where does the video pick come from

Trish in customCSS

HRH see that twit, Nav?

Debra That is, bigger taller than the nav bar?

Kerry @Debra a bigger image will force the menu bar taller

Nathan You could make buttons different colors for each button if you wanted

Nathan dunno why you'd want too

Becky @ Kerry You would fit in here, easy to speak Spanish everyday

Nathan put a blackberry for blackberry...

April does Navigation Label have to be filled in or can be blank?

karen "what if the image is bigger - can you ""crop"" it so what extends does not show?"

Kerry @BB is this what Koop did in Expansion for the menu in the sidebar?

Debra @Kerry--I thought that would happen.

karen Like - masking the image?

Trish Also, it seems like you can target things in a number of ways, either via build-module-navigation or as you did on the twitter via #menu-newmenu - is one way better than other? does it matter as long

ward some of the categoization in the codex is not helpful... like tips and tricks

Debra Like adding a search box in the nav bar through functions.php--can you do this now throught this method?

Nathan @karen - I think it would be better to crop out just what you want to show in an image editor

Kerry OHHH post that link please

Nina! speaking of Sridhar...there's a chance he'll be in OKC for the February LIVE Event. Not definite, but thought you'd want to know.

Kerry I need that floating thing

Nathan @Nina - really??

kathy need to change my nav so current page user is on will show the nav label differently. will this work for that

Nina! @Nathan - we're working on it

karen Thx, nathan

Kerry @Nina February live event?

Barbara Rowen I've not been able to get the CSS3 PIE to work for me. Has anyone been successful?

Nina! February event - Feb. 17&18 - will focus on iThemes Builder
Aditi @bb how to hover right in the nav with css?
Supersonics Forever I guess the diff is that the social icons are moved to the right rather than being next to the navigation.
wayward you can still move them over using margins
Nathan drop down social icons
Debra @ Nina--when in February? I thought the next one was in March?
Debra @Nathan--cool idea!
Nina! Feb. 17 & 18
Kerry @Debra I thought the next one was January, LOL
Nathan that font cache is noisy
Debra @Kerry--I mean the first one after Jan.
Debra @Nathan--lol
Andi yes, I have done this using page IDs....
Kerry @Debra an @Nina! where have I been? lol
wayward *excited!*
Andi cool.
Nathan sweet idea
Debra This is something I have been wishing I could do soon!
Kerry hey where did that custom css box come from?
Trish nice, need this!
BenjaminBradley <http://pastebin.com/at58vLPd>
Kerry HA!!! I love this!
wayward omg, I need this - thank you
Nathan Don't paste code from the word doc... bad things can happen
Nathan like zombie attacks and such
TomD @bb: Does this go into the function.php?
Kerry OMG! this is BRILLIANT!
Nathan @Kerry - ain't it?
Debra @Nathan--I've seen them; they are nasty!
Andi where do you place this code?
wayward this is THE BEST thing I've seen in ages
wayward WP core should absolutely add this as a built in feature
Trish ths is super helpful
Kerry how do you copy from the paste thing you provided?
Andi it would work for widget content, in a widget?
Barbara Rowen @wayward...only if the WP guys came up with the idea themselves...otherwise, never
OverHall @Kerry above ad - click copy or download
Kerry @Andi ther is another plugin that does what widget Content does and more - Check out Spots
Nathan but it will work on regular CPTs
Nathan ?
Andi OK, thanks for trying. thanks, Kerry.
Debra All this code is in the PDF, right? And it is added to the functions.php file?

Kerry @OverHall copy to clipboard?
OverHall @Kerry - got it??
Mig @BB - Does that code populate the Custom CSS field in the page?
MJ_McL @Debra. Yes
EricKing And this CSS overrides all the others (because it loads last), right?
Kerry @Janet, I think so, lol
Mig @BB - Got it. Thanks!
Nathan @eric - I think, unless you have an !important somewhere that overwrites what you overwrote...

Andi what does the 'normal ' and 'high ' mean in the add meta box area?
Debra @MJ-Thanks. This is so awesome!
Nathan would be better on side I think
Nathan awesome
Andi interesting. thanks!
Kerry if it is normal can you still drag to side?
Kerry cool
Andi wow
Kerry I always rearrange thos for my workflow
Nathan ... and this is why we love the member chats
EricKing how often does Google add new fonts?
Kerry love the webfonts and so glad this is available...
BenjaminBradley <http://googlewebfonts.blogspot.com/>
Kerry oh wow - I did not know about that!
Andi yes,.... hard copy, you mean?
wayward yes!!! yes it would!!!
Nathan I just call every site Grumpy Wizards...
BenjaminBradley <http://code.google.com/p/googlefontdirectory/>
Kerry hehehe I typically add them to my GIMP and use an image, lol
Kerry "@Nathan I still like "" The Lazy fox..."
Kerry Always thought it was cool to have a sentence contain every letter of the alphabet

Nathan niiiiice
katiebegood Be careful - it's tempting to install them all! Get a program called Typograph - it allows you to view all your fonts not installed and when it opens a font, you can use it.

David Perednia I am sorry if I missed it, why would you want to burden your own computer with all that data?

Debra If you purchase a downloadable webfont (that is not available for free), and you have it in a file on the server, can you use it by itself without making a font family or font stack?

Doug Yep!
Nathan and have too many fonts...
Stacey @BB is fontExplorer XPro for PC also?
Martina Hello everyone. Late, but glad I made it. :)
karen FONTS ARE LIKE SHOES ARE FOR WOMEN.
wayward ohhhhhh

Nathan lol @karen awesome
Barbara Rowen I've got over 9,000 fonts currently...whew...
Nathan Lobster is the new Comic Sans
David Perednia So mercurial or TortoiseHG does not download to your computer
wayward @Nathan agreed
karen Barbara, ve got over 9,000 shoes!
Doug @nathan lol!
David Perednia But it still takes up disk space
Martina @Stacey...here's the link - <http://www.fontexplorerx.com> - for Mac & PC

Stacey @Martina, TY
Nathan Hey Martina!
Martina YW...looks like I came in right on time. :)
Trish yes thanks Martina
Debra If you purchase a downloadable webfont (that is not available for free), and you have it in a file on the server, can you use it by itself without making a font family or font stack?

David Perednia I'll ask Santa
Barbara Rowen @Karen, I'm not a big shoe person but I do like fonts.
Martina Hey hey, Nathan. :)
BillG Where to get Explorer X Pro?
Nathan But wait for a few months cause HDD prices are through the roof right now

Kerry @BB lol very politically well said
Martina yw Trish...
David Perednia Have you seen Hard Drive prices lately with the Thailand floods?
Nathan Flooding in SE Asia... HDDs are double normal price
James Is FontExplorer like \$80? One time or annual?
HRH stick it on a USB OR External hard drive
Deborah @Nathan yes noticed that, why??
Valerie finally... of the phone and online.
Martina I wonder if it can be run from Dropbox.
Debra Hey Valerie!
Martina I did see a trial version too...
TomD it's \$80 us or euro
Barbara Rowen I use Font Expert. Is that similar? Do you know?
April BB did you delete FontBonk to add font explorer?
James It's \$79 US
Valerie I use FontExplorer, love it!
James But is it annual license?
Doug No kidding!
Valerie @James, one time license.
Nathan Like a home inspector
katiebegood If you have a pc and want a cheaper font manager, use Typograph.
<http://www.neuber.com/typograph/>

James K

Kerry Hi Valerie! Long ime no see
Kerry *time
Deborah @Nathan re HDD, ok, thanks.
Nathan Hey @Valerie
Barbara Rowen How about Font Expert?
katiebegood Typograph is \$35.
Stacey @BB what was the webinar where you taught us Mecurial?
Stacey Ha
Valerie Especially when you've been collecting fonts for 20 years!
Barbara Rowen Well, hi Valerie. Good to see you again.
Kim NexusFont is free - <http://xiles.net/nexusfont/>
Nathan @Val - indeed! I found a script font I thought was really cool 15
years ago the other day. Delete.

wayward argh, true
Deborah need a class just on file management
Trish I am so glad to hear it is not just me!
Nathan Downloading the actual font is super helpful for creating Fireworks/
Photoshop mockups

Valerie I actually had to replace some type 3 fonts a year or so ago. I was a
font-addict back in the day.

katiebegood For me it's free vector graphics!
Kerry @Nathan LMAO too funny
Andi glad I'm not alone here.
HelenG Amen! Make the hard drive slave in the new machine!
MikeB What the hey, just add another terabyte HD :)
OverHall LOLOLOLOL - oh yes - time to get organized!
Barbara Rowen I wonder if they will do a reality show about us...WebHorders
wayward exactly
James But we install each new font the same way? How does this work
when they're coming from your local machine?

Stacey I use a back up drive for all my zip files
David Perednia Wow, you must be psychic
Kerry I collect LOTS of PDF's and resource material
pixeljuice I still have OS9 files.
Valerie Glad to see we all have our obsessions!
TomD Second hard drive is nice.
Deborah can we have a webinar with a guest technology organizer. :)
Trish or third
Nathan @Deb - if only...
pixeljuice stack-o-hard drives
MikeB Every now and then I look at stuff on my system and wonder where
it came from or why I wanted it...

Nathan My problem is that I love the concept of organization, but I never
get around to the doing of the organization...
Kerry @JustinSeeley said he only uses like 3-5 at any time and goes
through phases... I like that approach and I do have my favs

Martina Okay, it took me a while to find it, but my friend who is a graphic designer uses amp font viewer and it's a freebie.

Martina <http://www.ampsoft.net/utilities/FontViewer.php>

James How would you grab the code from your manager?

Valerie Good golly! I didn't notice Google had so many font families... and I was just there yesterday.

katiebegood "BTW, what does ""web friendly"" mean?"

Deborah @Nathan I suspect you're not alone in that. ;)

Trish another symptom the desire but inability to organize....

Kerry whatthefont.com is a good place to find out what the font is that you see some where. You just upload an image and it tells you what it is I have Papyrus... all is right with the world

Nathan I have Papyrus... all is right with the world

Kerry <http://whatthefont.com>

OverHall Their mine - their mine - their mine!

Martina ROFL @ Nathan...not Papyrus?

Valerie @Nathan, my problem stems from that... if it's not going to be organized right, I leave it be... hard to get around to all that filing, organizing stuff. Lots of un-put-away stuff!

karen it's like money in the bank!

Kelly My Precious!

MikeBand yet I use Helvetica most of the time....

ErickKing I used to work at a place that spent the week b/t Christmas & New Years doing only purging & archiving. No client work; casual dress with music playing. Brilliant.

Martina I put that on an image earlier this year and my graphic friend had a field day with me.

Nina! @ErickKing - great idea. I think I'll do that in my own office this year!

karen Kelly- hilarious!

pixeljuice Thanks BB

Nathan @Eric - great idea

TomD @katie: If you have Arial, it is probably safe for Web. Helvetica is not on everyone's computer so it is not Web safe.

Deborah Buddypress, can't wait!!

ErickKing @Nina: it meant that nothing was more than one year out of date. (Amazing!)

Nathan Duct Tape Alert

Barbara Rowen Let's hear it for Javascript...HURRAY!

MikeB Thanks Benjamin! Another great session!

wayward I can't wait for that one

Barbara Rowen @Nathan, collecting my stash now...

pixeljuice I'd asked for that one... EXCELLENT!!!

Martina @Eric, I like that idea too. Been kinda doing that since my surgery.

pixeljuice CSS + javascript, yes?

pixeljuice wow

Andi just style sheets for each device?

Nathan "@Barb... Let's hear it for javascript...
document.write("""<h1>HURRAY</h1>""");"

MikeB Duct tape is like the Force - it has a Light side and a Dark side and holds the universe together...

suziekane @BB the java class is for advanced users?
Deborah @Kelly just read your comment, LMAO.
Kelly @ Deborah....love my Lof the Rs
Kerry @Eric I find myself forced to that often... I have a 3 phase process... I organize my downloads folder. I file individual files into folders and then move from folders to long term storage... then pur

Valerie The events tab that appears at university.webdesign.com has listings from September. I found the right page, but what's going on with that?
Kerry purge tose annually
suziekane Thanks. I have the willingness, but I'm prioritizing my webinar time .
Deborah @Kelly took me a sec to clue in. I can picture you saying that to your fonts. ha ha

Debra @BB--Today was awesome. Thanks for sharing your brilliance!
Nina! @Valerie - that's the old site we stopped using after Sept.
wayward Thanks @BB
suziekane Thanks @BB!
Ruanna thanks as ever
Stacey @BB Many thanks
Nathan This was a good one
Martina I'm trying to be strong and not get that discount...i think my membership is good through 2012

Barbara Rowen Thank you, @BB. Looking forward to next weeks classes. :)
Becky @BB thanks
HRH was the pugsley story recorded BB?
Deborah Thanks BB. Cuddles & kisses to Pugsley!
Andi thanks, @BB
Martina @Nina, where do I go to verify my expiration dates?
Kerry @HRH no it was not
Deborah yes it was
Kerry @Martina email sales
HRH ok, I will rewatch and find out
Nathan Have a good weekend everybody
Martina Thanks!
Ruanna HRH: recap - Pugsley was an abused 5-year-old dog that BB & Mrs BB got from the shelter. They picked him up because he was the stinkiest.

wayward Bye!
Nina! @martina - email sales@webdesign.com
EricKing "@Kelly: have you watched ""The Hunt for Gollum"" yet? We plan on doing so over the next few weeks."
MikeB Happy trails to you...

Nina! I don't have one named WebDesign.com
Here's a quick video showing you how to search for it. If you are an affiliate, then you have all the same links as everyone else. <http://affiliates.ithemes.com/apply/how-to-apply-to-be-an-affiliate-v>

Nina!
suziekane oops wrong link. hold on
Nina! @Nina I just submitted to be an affiliate.
Here's the video showing you how to find your specific affiliate links:
<http://affiliates.ithemes.com/getting-started/how-to-find-your-affiliate-links/>

Nina!
suziekane Great @suzie!
Nina! have a great weekend!
Mig ciao everyone
@Nina - ok, I'll watch it again. Not sure why that link is not on my list of affiliates.

Nina! I'm sure it's there @Mig since everyone has all the links. They jsut aren't always easy to find because they aren't alphabetical. :(

Mig @Nina - I did a find for WebDesign and it will not find it.
Nina! "Weird. Not sure how to help you there. I did a find and it found it. It was the second ""webdesign"" link on the page. The first one goes to the events page."

Mig @Nina - who can I contact to have it added to my page?
Nina! @Mig - if you will send me your username and password by private email (nina@ithemes.com) I will take a look.

Mig @Nina - I will. Thanks for your help. I appreciate it.
